Summary

Working as a UI/UX Engineer with 6 years turning ideas into polished, high-fidelity interfaces for electronics and smart facility platforms. UI creation is at the core of my work designing in Figma, then using vibe coding and AI tools to bring designs to life faster and iterate in real time. Always pushing to stay ahead of design trends, new tools, and AI-driven ways of working.

Education

Singapore Polytechnic

Jan 2026 to Mar 2027

Specialist Diploma in Motion Graphic Design

Singapore Polytechnic

Jan 2022 to Mar 2023

Specialist Diploma in Full Stack Web Development

SIM RMIT

Jan 2019 to Apr 2020

Bachelor of Business (Marketing)

Temasek Polytechnic

Apr 2015 to Apr 2018

Diploma in Business Information Technology

Work Experience

ST Engineering, Senior Executive UI UX Engineer

Mar 2020 – Present

- Collaboration with cross-functional teams (in-house/ oversee developers)
- Designed end-to-end UI/UX across desktop, videowall, and mobile platforms, covering both admin and non-admin facility operator screens
- Designed dashboards and drew graphic illustrations to support product and branding needs across projects
- Created and maintained design systems and iconography libraries across multiple projects for consistency and scalability
- Used low-code/no-code tools to design workflow management systems, building designer screens and connecting UI variables directly to backend databases
- Communicated directly with clients to present design style guides and gather feedback, ensuring design direction aligned with stakeholder expectations
- Managed a cross-border design team (Singapore and Vietnam) to ensure consistent design execution across projects
- Used Figma and vibe coding to rapidly prototype and iterate designs, working closely with developers to ensure smooth handover from design to build

Key Projects:

Punggol Digital District Smart City Platform — UI/UX and graphic designer responsible for building the project's design system, ensuring consistent visual language across all interfaces.

Lusail City Smart City Platform — UI/UX and graphic designer for Lusail's design system, covering command-and-control interfaces, operational dashboards, and public-facing smart city components.

RippleCreate Pte Ltd, Coding Main Instructor

Oct 2017 – Present

- Conducted Online classes teaching students on designing website on various platform eg.(Wix, Wordpress, Cospace (VR/AR))
- Delivered online & f2f classes on Roleplay game design development elements using Scratch platform key development processes including storyboarding and design thinking
- Taught students how to build Android App UI prototype using MIT App Inventer
- Conducted Block Based Coding for Primary and Secondary ICT program, (curricula covering Python (Beginner), Micro:Bit, MBots, Scratch, Gamemaker, Kodu, Matalab, Cospaces and Drone)

Digitals Trends Pte Ltd, (Freelance)

Feb 2020 to May 2020

- Created Branding Guideline for website
- Company Typography, Logo, Corporate color palette and Mood board
- Designed UI prototype for Digital Trends website and collaborated with Developers on Implementation

Skills

- (Design) - Figma, Photoshop, Illustrator, After Effects
- (Coding) - Block based coding (Micro:Bit, Scratch, Wix, Wordpress, Co-spaces), HTML, CSS, Javascript, Claude
